(Patent Pending 526401, Design Registration 403028)

*Showerdome has proven extremely effective under test conditions,
however individual effectiveness will depend on shower design.

GOODBYE TO *shower steam*

*It's a brilliant KIWI invention-
so simple and it really works.*

NEW ZEALAND MADE

PROBLEM: BATHROOM MOISTURE

It's annoying and damaging... steamed up mirrors, dripping walls, wet ceilings, damp floor coverings and paint damage caused by mould and mildew.

SOLUTION: SHOWERDOME

Now you can do away with these costly problems by installing the simple, effective SHOWERDOME.

We have a range of shapes and sizes to suit most existing and new shower cubicles.

LET US EXPLAIN...

Q: How does it work?

A: Bathroom steam forms when warm moisture laden air generated by the shower mixes with the cooler air in the bathroom. It's simple, but so effective (see diagram).

NO STEAM is created.

Q: Will it save money?

A: YES! There is no need to run extractor fans or bathroom heaters. You are likely to reduce your hot water temperature and consumption. You will also save on cleaning products, and long term bathroom maintenance is greatly reduced!

Q: Are there any ongoing running costs?

A: NO. Once the dome is fitted there are no more costs. It has no moving parts, there is nothing to break down.

Q: Can I fit the SHOWERDOME myself?

A: Showerdome is a simple concept, however it is best fitted by trained installers who have the special fitting products, equipment and expertise to tailor the Showerdome to fit your shower.

HERE'S HOW SHOWERDOME WORKS

Without Showerdome

Whenever warm air comes in contact with cold air, steam is quickly formed. This is most evident in your bathroom when you turn on the shower. Moisture then covers all the surfaces in your bathroom and adjacent rooms causing inconvenience, damage and expense!

With Showerdome

The Showerdome is fitted across the opening at the top of your shower box. It is specially designed to keep out the cooler air while generating the circulation of warm air within the shower.

Yes!

**WE CAN CUSTOM FIT
TO MOST EXISTING AND
NEW SHOWERS.**

WHAT SOME SHOWERDOME USERS SAY:

"Our shower is much warmer and has stopped the mould and mildew. Showerdomes are definitely on the shopping list of our new home". *Mark & Trudy*

"Our Showerdome has solved the problem of our steam in our bathrooms. The mirror stays clear and I don't have to open a window on cold days". *Heather & Neville*

"Fantastic Product! I recently had a Showerdome installed and I'm extremely impressed, not only am I now not having to turn on my exhaust fan but also using much less hot water, both of which are reducing my electricity consumption resulting in cheaper bills! My mirror no longer fogs up and cleaning is made so much easier, also great in winter, shower stays beautifully warm. I highly recommend this product to anyone". *Julie*

"We have recently installed a Showerdome over a shower in our guest bathroom, which had a moisture problem from the shower steaming up the room. The results are excellent and the Showerdome has met all the advertised features of the product. We highly recommend its use for such appliances". *Henry*
